

A Forum for Dialogue

Managing Drilling Margins and Well Control Risk, Ensuring Risk and Innovation are not Impacted

Tuesday, 29 November 2016

Schlumberger, Richmond Campus
3600 Briarpark Drive
Houston, Texas 77042

The intent of this Forum is to stimulate dialogue among the ocean energy stakeholders. We will take this opportunity to share and discuss Best Practices in: How do we continue to enable a common understanding and usage of drilling margin and well control terms and processes? What are the good practices in managing pressure while drilling? What emerging technologies and processes will be available in the future to help manage drilling margin and well control risk. Additionally, we expect to have a session with BSEE leaders to answer Well Control Rule concerns. Schlumberger will host a tour of their Operations Support Center. In small group sessions, we will discuss the inhibitors to new technology and processes in this realm. The product of this Forum will be proceedings that will include presentations, discussions, current and best practices, ideas and tasks to help continuously improve safer management of Drilling Margin and Well Control Risk.

Tuesday, 29 November 2016

Register at: <http://bit.ly/2f0hk3Q>

7:00AM -8:00AM –Registration - Continental Breakfast	
8:00AM	Welcome – Jim Pettigrew, <i>Director of Operations, OESI</i>
Session I Enabling Common use of Terminology Session Chair: Mel Whitby - Cameron	
8:15AM	Panel Members Lisa Grant – Noble Energy Mike Vander Staak – Hess Corporation
8:45AM	Open Forum Dialogue
9:05AM	Chair’s Summary
Session II Good Practices in Managing Pressure While Drilling Session Chair: Garth Pulkkinen – Noble Drilling	

9:15AM	Panel Members Julien Converset – Schlumberger, Schlumberger’s Good Practices John Kozicz – Transocean, Transocean’s Good Practices Tom Burnett – Blade Energy, Blade Energy’s Good Practices
9:55AM	Open Forum Dialogue
10:15AM	Chair's Summary
10:25AM	Morning Break – Networking and Refreshments
Session III Emerging Technologies and Processes Session Chair: Jose Gutierrez - Transocean	
10:45AM	Panel Members Brian Murrant – Rowan Companies, Rowan Company’s Way Ahead Justin Rodriguez – FMC Technologies, Annulus Monitoring System Robert Ziegler – Weatherford, Upcoming Managed Pressure Drilling Efforts Kelly Rose – National Energy Technology Laboratory, Enhanced Subsurface Pressure Prediction Jerome Schubert – Texas A&M University, Ongoing Research in Risk Mitigation
11:55AM	Open Forum Dialogue
12:20PM	Chair’s Summary
12:30PM	Lunch
1:00PM	Breakout sessions will focus on Inhibitors to new technologies and processes; and Issues for well control and drilling margin in an HPHT environment. <ul style="list-style-type: none">• Red Group Facilitator – Domenic Carlucci• White Group Facilitator – TBC
Afternoon Break at Facilitator direction	
3:30PM	Convene as full group for report back from breakout sessions <ul style="list-style-type: none">- Group facilitators will present summary of discussion, to include items identified for further action.
4:00PM	BSEE Session on Well-Control Rule
5:00PM	Recap and Closing Remarks – Jim Pettigrew, Director of Operation, OESI
5:15PM	TOUR OF Schlumberger Operations Support Center – Eric Englehardt, Schlumberger
