

***Discussing Best Practices for Real-Time Monitoring (RTM)  
of Offshore Well Construction  
1:30-4:00PM  
April 17, 2017  
Double Tree at IAH  
15747 John F. Kennedy Blvd., Houston, TX 77032***

<u>Start</u>	<u>End</u>	<u>Session Name/Purpose</u>
1:00 PM	1:30 PM	Registration
1:30 PM	1:40 PM	Opening Remarks - Mr. Jim Pettigrew
1:40 PM	3:00 PM	<p>Review and Presentation of Best Practices for RTM - Dr. Eric van Oort, Mr. Nathan Zenero</p> <p>The central purpose of this document is to provide a framework for operators to leverage real-time monitoring (RTM) capabilities and technologies to, within reason, prevent or mitigate potential or actual threats to life, health, property, or the environment for ongoing operations under the jurisdiction of BSEE. It is not intended to cover all possible scenarios nor is it intended to act as requirements or rules. It is believed that the practices described herein are likely to lead to mutually beneficial outcomes wherein regulators can easily evaluate technical and operational competence and compliance, and operators can gain deeper insight into their operations and supply chains with minimal impact on time and resources. It is the intent of BSEE and OESI to provide additional clarification and assistance as necessary and to promote safe and productive operations.</p>
3:00 PM	4:00 PM	Questions and Answers - Dr. Eric van Oort
4:00 PM	4:05 PM	Closing Remarks - Mr. Jim Pettigrew
